

RAVIPATI CHINNA RANGASWAMY REDDY

MACHINE LEARNING ENGINEER | FULL-STACK DEVELOPER | HEALTHCARE TECH BUILDER

Hyderabad, India | ravipatichinnarangaswamyreddy@gmail.com | github.com/chinnaranga | linkedin.com/in/r-chinna-ranga-swamy-reddy-

PROFESSIONAL SUMMARY

Results-driven Machine Learning Engineer and Full-Stack Developer focused on building end-to-end intelligent software platforms. Demonstrated expertise in deploying supervised predictive machine learning pipelines (82% accuracy in financial risk benchmarks) and architecting high-performance Next.js 16 single-page web applications with stateless authentication and Cloud Firestore clusters.

EDUCATION

Woxsen University, Hyderabad, India

2023 - 2027

Bachelor of Engineering in Computer Science and Engineering (B.E. CSE)

Key Coursework: Machine Learning, Data Structures & Algorithms, Computer Vision, Distributed Big Data Systems, Database Systems

TECHNICAL SKILLS

Machine Learning & AI:	Python, PyTorch, scikit-learn, LightGBM, XGBoost, Pandas, NumPy, FastAPI, Model Serving
Full-Stack Engineering:	React 19, Next.js 16, TypeScript, Node.js, Express, REST APIs, Tailwind CSS v4, Redux
Cloud, DevOps & Data:	Docker, Firebase Auth, Cloud Firestore, PostgreSQL, AWS, GCP, Git, GitHub Actions, CI/CD
Healthcare Systems:	Clinical EMR Schemas, Unique Patient IDs, OTP Verification, Tamper-Evident Hash Audit Logs

PRODUCTION PROJECTS

HealthChain - Decentralized Healthcare Clinical Platform

healthcare-edb75.web.app

- Built a zero-trust clinical EMR access system featuring OTP-verified multi-factor patient identity consent.
- Engineered tamper-evident medical record verification using client-side SHA-256 integrity hash chains.
- Deployed on Firebase with strict document-level Firestore rules, achieving sub-200ms record retrieval times.

FAR (Find a Role) - Career Discovery & Talent Matching Engine

farfindarole.com

- Created low-latency engineering career exploration platform with multi-attribute candidate search indexing.
- Designed semantic skill clustering and role taxonomy parser to surface relevant job matches under 50ms.
- Optimized mobile layout and responsive state caching, serving active live production traffic.

Feasto - Full-Stack Dining & Hospitality Platform

feasto.food

- Engineered responsive digital food menu and ordering platform with zero layout shift (CLS = 0.0).
- Implemented deterministic cart state reducers with local storage caching for offline-resilient ordering.
- Reached 95+ mobile Google Lighthouse performance score via aggressive SSR image pre-hydration.

ENGINEERING EXPERIENCE

Frontend & Full-Stack Developer | Contracts & Product Builds

Jun 2025 - Present

- Architected reactive single-page applications with Next.js 16 and TypeScript, standardizing modular components.
- Built stateless authentication gates with Cloud Firestore security rules for medical and career dashboards.

Machine Learning & Data Science Engineer | Applied ML Projects

Aug 2025 - Nov 2025

- Formulated supervised ensemble models (Random Forest, LightGBM) to forecast credit risk probability distributions.
- Optimized default risk recall threshold, achieving 82% validation accuracy with 0.86 ROC-AUC score.
